CONTINUING EDUCATION

Package Plans/Courses
2020-2021

For Dentists and Members of the Dental Team

Featuring Nationally and Internationally Known Speakers

If you were part of a 2019-2020 Package Plan, you will receive a $100 discount on a 2020-2021 Package Plan
Sign up for courses by filling out the registration form included in this brochure, or by going to the MDA’s CE website www.medentalce.org and registering online!

WHAT IS THE PACKAGE PLAN? The Package Plan offers a group of courses (7 for dentists, 4 for hygienists/assistants/staff members) that you can sign up for in advance at a fixed price.

CAN I SIGN UP FOR COURSES INDIVIDUALLY? Yes, you absolutely can! The prices for individual courses are listed on the registration form and online.

The MDA’s Continuing Education Committee is pleased to offer selected presentations for dentists and allied personnel. There are many outstanding courses in this Package Plan, including virtual presentations, as well as live lectures at Maple Hill Farm and at the 2021 MDA Convention. Package Plan rates offer considerable savings over registration fees for individual programs. You may register for individual courses, but the Dentist Package Plan offers savings of over 50%. Hygienists, assistants, staff members and allied dental team members save over $30 each on the courses in their Package Plans.

MDA CE Course Weather Cancellation Policy

NOTE: The ONLY reason a course might be cancelled is if the speaker does not arrive.

- The Maine Dental Association will try to determine the possibility of cancellation of a course the day before
- If needed, a message with event information will be recorded on the phone line at the MDA Office (207-622-7900) and will also be placed at www.medentalce.org

If you have any doubts concerning the possibility of cancellation, call the MDA Office or go to www.medentalce.org.
MDA 2020-2021 MDA CE Course Registration

REGISTER AND PAY FOR COURSES ONLINE AT WWW.MEDENTALCE.ORG

The Package Plan/CE registration form included in this brochure is for dentists, hygienists, assistants, staff members, and allied dental team members. Please duplicate forms for each participant.

NOTE: IF YOU WERE PART OF A 2019-2020 PACKAGE PLAN, YOU WILL RECEIVE A $100 DISCOUNT ON A 2020-2021 PACKAGE PLAN.

2020-2021 Maine Dental Association Continuing Education Schedule

(* = Hygienist/Assistant/Staff Member and Allied Dental Team Member Package Plan Courses - All courses are in Dentist Package Plan)

• October 2, 2020 - Tobacco and Nicotine Products: How They Impact Your Patients, Your Families, and What You Can Do About It/Beating The Odds: A Story NOT Silenced By Oral Cancer - Dr. Nevin Zablotsky and Eva Grayzel (This course will be held virtually via Zoom)*
• November 20, 2020 - Connections Between Oral Health and General Health/From Basic Science To Hard and Soft Tissue Regeneration/Dental Implants in the Esthetic Zone - Do’s and Don’ts/Treating Edentulism - Lessons Learned - Dr. Nadeem Karimbux and Dr. Hans-Peter Weber (This course will be held virtually via Zoom)*
• December 11, 2020 - Allergies and Dentistry/Drug Interactions and the Top 30 Drugs Your Patient Is Taking - Dr. Ronald Brown (This course will be held virtually via Zoom)*
• March 26, 2021 - Technology In Your Dental Practice/Diagnosis, Planning, and Treatment Using New 3D Technology - Dr. Paul Feuerstein (Maple Hill Farm Inn and Conference Center, Hallowell - subject to change)
• April 16, 2021 - Anterior All Ceramics: From Case Selection to Cementation - Dr. John Nosti (Maple Hill Farm Inn and Conference Center, Hallowell - subject to change)
• May 21, 2021 - Five Patient Lifestyle Habits That Influence Healing/Do Your Patients Have The Guts To Enjoy Oral Health? - Dr. Uche Odiatu (MDA Convention, Harborside Hotel, Spa & Marina, Bar Harbor - subject to change)*
• May 22, 2021 - 25 Shades of Grey & A Lot Less Risqué/Great Cases With New Faces - Dr. John Svirsky (MDA Convention, Harborside Hotel, Spa & Marina, Bar Harbor - subject to change)

You will be required to register for courses for the MDA Convention on a SEPARATE CONVENTION REGISTRATION FORM. There will also be a $25 registration fee for attending the convention. You must register for the convention to attend the courses, even if you signed up for a Package Plan. 2021 MDA Convention registration information will be mailed and available at a later date.

Course Attendees PLEASE NOTE:

• Attendees will be sent confirmation emails/reminders prior to each course
• A unique email address is needed for all attendees for the virtual courses
• Individual course cancellations will be accepted until one week before the program, less a $15 processing fee. Another staff member may be substituted. There will be no refunds for Package Plans.
• Package Plan dentists cannot send a substitute dentist in their place
• Handouts the speaker makes available prior to the course will be available on the MDA website
• Please remember that it is your responsibility to make note of verification code(s) in order to prove your attendance at MDA continuing education courses. Codes are not given out at any other time other than when the morning and/or afternoon sessions are completed. Keep verification forms for your records.
• Exit exams for online courses will be available for anyone seeking a certificate of completion
Tobacco and Nicotine Products: How They Impact Your Patients, Your Families, and What You Can Do About It/Beating The Odds: A Story NOT Silenced By Oral Cancer

(6 hours)
Nevin Zablotsky, DMD, and Eva Grayzel

This course will feature two presentations.

**Tobacco and Nicotine Products: How They Impact Your Patients, Your Families, and What You Can Do About It:**
The use of tobacco products continues to create serious health compromises to those addicted to its use. The harmful effects to the lungs and heart, along with many other organ systems, will be discussed, along with the varied significant compromises to the oral cavity, with the most dangerous being oral cancer. This course will help wade through the various types of tobacco products on the market, with an additional discussion of the most recent impact of e-cigarettes and JUULs on adults, as well as elementary and secondary students. There will be a review of the latest pharmaceutical drugs being utilized to quit tobacco use, as well as other techniques, such as motivational interviewing, to help work with patients. The use of role-playing scripts will be offered to help simplify for dental offices how to communicate with their tobacco-addicted patients, and guide them to cessation resources. The ultimate goal of this course will be to help dental health care professionals’ work with their nicotine addicted patient a truly gratifying experience.

**Beating The Odds: A Story NOT Silenced by Oral Cancer:** Eva Grayzel transports dental professionals into the oral cancer patient’s experience, sharing riveting details about her delayed diagnosis and finding the strength to persevere through the devastating effects of radical surgery and radiation, motivating new thinking about oral cancer screenings and patient education. Her compelling narrative humanizes oral cancer, inspiring audiences professionally and personally.

**Disclosures:** None

---

**Dr. Nevin Zablotsky** received his dental and postgraduate degree in periodontology from the Tufts University School of Dental Medicine. He has lectured throughout the US and internationally on tobacco-related issues, was a lecturer for the ADA CELL Seminar Series, and lectured at the 2017 ADA Annual Meeting. He recently authored a chapter on tobacco and oral health, and tobacco cessation, in the periodontal textbook “Non-Surgical Control of Periodontal Diseases.” He has received the Vermont Advocate of the Year award from the American Cancer Society and the lifetime achievement award from Vermont Special Olympics, and was the past president of the Vermont Periodontal Society. He presently is a senior consultant and lecturer at Nova Southeastern University dental school.

**Eva Grayzel** told her story at the 2003 national ADA conference on the main stage to 9,000 dentists. That’s when she knew she her story needed to be heard. Since then, she has become the voice for oral cancer, speaking internationally at dental/medical and survivorship conferences on the patient perspective. She performed her story as a one-woman show off-Broadway. Eva founded Six-Step Screening, an oral cancer awareness campaign, and for the success of the campaign, was given honorary membership to the American Academy of Oral Medicine.
November 20, 2020

- This course will be held virtually via Zoom
- 9:00 am - 4:00 pm (breaks will be taken)
- Handouts, if made available, can be downloaded from the MDA website

Included in Dentists and Hygienists/Assistants/Staff Members Package Plans

Connections Between Oral Health and General Health/
From Basic Science To Hard and Soft Tissue Regeneration/
Dental Implants in the Esthetic Zone - Do’s and Don’ts/
Treating Edentulism - Lessons Learned
(6 hours)

Nadeem Karimbux, DMD, MMSc, and Hans-Peter Weber, DMD

This course will cover four topics.

Connections Between Oral Health and General Health: Inflammation is considered to be the common factor for many chronic diseases. This lecture will review the pathogenesis of periodontal diseases. The cause and pathways of the inflammation cascade will be reviewed, with a focus on why C-reactive protein has become an important marker for systemic inflammation. There will also be a focus on cardiovascular health and diabetes.

From Basic Science To Hard and Soft Tissue Regeneration: The clinical techniques of soft and hard tissue regeneration have advanced based on our understanding of basic science principles. This presentation will focus on the basic principles of wound healing and tooth generation. The definitions of different graft types including advantages and disadvantages of each will be reviewed. Clinical cases will also be presented.

Dental Implants in the Esthetic Zone - Do’s and Don’ts: The purpose of this lecture is to review contemporary planning, surgical, and restorative key points for anterior tooth replacement. Surgical and prosthodontic procedure clinical cases will be presented. Complications of various etiologies and suggestions, and how to avoid or treat them, will be part of the lecture, as well.

Treating Edentulism - Lessons Learned: Treatment options for edentulism range from dentures to fixed full-arch prostheses. As dental clinicians, we can educate patients and recommend full-arch treatment as today’s standard of care. From diagnosis to treatment planning, there are new technologies and clinical perspectives. This course will provide market data and provisions that will make full-arch treatment affordable, acceptable, and successful.

Dr. Nadeem Karimbux is the dean at Tufts University School of Dental Medicine. He is a professor of periodontology, and is known nationally and internationally for curriculum development and management. He has received numerous honors during his academic career. Dr. Karimbux is a board-certified periodontist. He was a staff member at Childrens Hospital Boston, where he treated children and young adults with periodontal disease. Dr. Karimbux has been involved in several studies looking at periodontal and bone regeneration, peri-implantitis and the links between oral and systemic health. He has published more than 110 papers, authored textbooks, and lectured worldwide.

Dr. Hans-Peter Weber, professor emeritus of prosthodontics at Tufts University School of Dental Medicine, serves as clinical director and prosthodontist at ClearChoice Dental Implant Center in Quincy, Mass., where he provides implant-prosthodontic patient care. He teaches part-time in postgraduate prosthodontics at Tufts. He has contributed extensively to scientific and clinical literature in the field of implant dentistry and is a regularly invited panelist nationally and internationally. Dr. Weber serves on the review boards of several peer-reviewed journals. An honorary member of the American College of Prosthodontists, he is a past president of the Academy of Prosthodontics.

Disclosures: Karimbux - None;
Weber - ClearChoice Dental Implant Centers
December 11, 2020

Included in Dentists and Hygienists/Assistants/Staff Members Package Plans

**Allergies and Dentistry/Drug Interactions and the Top 30 Drugs Your Patient Is Taking**

(6 hours)

Ronald Brown, DDS, MS

This course will cover two separate topics.

### Allergies and Dentistry

**Course Objectives:** Attendees should

- Know basic information regarding the incidence of allergies
- Understand the inherent problems with evaluating the patient’s history in regard to drug allergy
- Be able to list adverse drug reactions
- Have a comprehensive understanding of humoral immune responses mediated by B- and T-lymphocytes, and antibody function
- Be able to list the four types of true allergies, and describe the etiologies and clinical appearances of each form
- Be able to describe the clinical relevance of pseudo allergies
- Be familiar with the concept of challenging a diagnosis of drug allergy, and the limitations of challenge procedures, and be able to list challenge protocols
- Be able to describe the protocol for treating drug allergies

### Drug Interactions and the Top 30 Drugs Your Patient Is Taking

**Course Objectives:** Attendees should

- Be able to list and describe the most common drug-drug interactions
- Be able to distinguish between pharmacokinetic and pharmacodynamic drug interactions
- Be able to list the possible lethal drug interactions encountered within the clinical practice of dentistry
- Be able to list several beneficial drug-drug interactions
- Be able to list and describe the most common drug side effects from medical prescription drugs
- Be able to list the three most common drug categories among medically prescribed pharmaceuticals
- Be able to describe the proper communication perspectives when communicating with your dental patients’ physicians with regard to drug prescription issues

**Disclosures:** None

**Dr. Ronald Brown** is currently a professor emeritus in the department of oral diagnosis and radiology at Howard University College of Dentistry. He attended graduated from Georgetown University School of Dentistry in 1971 and served in the US Army Dental Corps at Fort Huachuca, Arizona, and returned to the Washington, DC, metro area in private practice in northern Virginia and DC. He completed postdoctoral education in pharmacology and oral medicine at Georgetown University in 1988. Since then, he has had faculty positions at Georgetown University School of Dentistry and School of Medicine, the University of Texas Health Science Center at Houston, Dental Branch, as a clinical associate professor at Georgetown University Medical Center, and as a volunteer clinical research associate at the National Institutes of Health. His areas of research concern oral medicine, drug-induced gingival overgrowth, clinical trials, and oral inflammatory diseases. He has been a long-term member in several dental, educational and scientific organizations. He is a reviewer and on the editorial board for a number of publications. He has more than 150 publications in referred journals and more than a dozen combined published books and book chapters. He is a diplomat and past president of the American Board of Oral Medicine, was the first secretary of the American Board of Dental Specialties, and is a past president of the American Academy of Oral Medicine.
March 26, 2021

• Maple Hill Farm Inn and Conference Center (SUBJECT TO CHANGE)
• 9:00 am - 4:00 pm (registration begins at 8:30 am)
• Lunch included only if attendance is confirmed in advance
• Handouts, if made available, can be downloaded from the MDA website

Included in Dentists Package Plan

Technology In Your Dental Practice/Diagnosis, Planning, and Treatment Using New 3D Technology
(6 hours)
Paul Feuerstein, DMD

Disclosures: Consultant - Bausch Dental, Bien Air, Dental Rat, Henry Schein, Philips

This course will cover two separate topics.

Technology In Your Dental Practice - A Review of Current Products and a Look Into The Future: In an overview of the latest high-tech products being integrated in today’s practices, learn about products in the following areas: road to chartless practice; cameras (digital and intraoral); digital radiography; caries and oral disease detection; computer imaging: shade taking: patient education: and the latest tech products. Specific examples, many which are used in Dr. Feuerstein’s private practice, will demystify many products and help you make intelligent design and purchase decisions. See several interesting new products that have recently come to the marketplace and some that have not yet arrived. A brief discussion of practice management and social media products will also be discussed. If you have already “gone digital,” there are plenty of tips and tidbits for you. If you have not “gone digital” yet, this course is a must.

Technology In Your Dental Practice - A Review of Current Products and a Look Into The Future
Course Objectives: Attendees will
• Learn about the newest high-tech products
• Receive information to help make informed purchase decisions for the practice
• See how the products are used clinically in a typical general practice

Diagnosis, Planning, and Treatment Using New 3D Technology: Follow the workflow from digital impressions, Conebeam CT, implant and restoration planning, and lab processes, all with the latest digital devices, including CAD/CAM. The latest high-tech dental developments will be presented and discussed, showing specific examples. The flow begins with digital diagnostics, 3D impression devices, CAD/CAM systems, cone beam volumetric technology, software, and implant simulation, related laboratory services and equipment, and other exciting emerging products. Also take a look at the new restorative materials and 3D printing developments.

Diagnosis, Planning, and Treatment Using New 3D Technology
Course Objectives: Attendees will
• Look at examples of the clinical process, from diagnosis to final treatment
• See the current and future digital impression products
• Learn the basics of cone beam software and hardware
• Receive information to help make an informed purchase decision in confusing marketplace

Dr. Paul Feuerstein graduated in 1972 from the University of Medicine and Dentistry of New Jersey and maintains a general practice in Massachusetts. He installed one of the first in-office computers in 1978, and has been teaching and consulting since then. He is the technology editor of Dentistry Today after 14 years with Dental Economics, author of more than 250 technology articles, and has lectured at many national and local dental meetings. His work with CAD/CAM helped develop the LAVA COS intraoral scanning system. He is also CDO of the Cellerant Consulting Group. He was named Clinician of the Year at the 2010 Yankee Dental Congress and is an adjunct assistant professor in general dentistry at Tufts University. In 2020, he has been named as one of the top 100 dental professionals in the world by the Global Summits Institute.
Anterior All Ceramics: From Case Selection to Cementation
(6 hours)
John Nosti, DMD

Are you wanting to perform more cosmetic dentistry in your office but are unsure which patients are great candidates, or what cement works best? Patients today are as cosmetically motivated as they have ever been. Join Dr. Nosti as he discusses case selection, smile design principles, how to order your wax-up RX, preparation designs, temporization technique, cementation, and all the records necessary from your first visit to delivery day. Case examples will be used!

Course Objectives: Attendees will:
• Be able to identify which patients are candidates for anterior all ceramic restorations
• Understand proper preparation design, depending on the case circumstances and goals desired
• Understand the principles of smile design
• Learn a predictable and reliable way to temporize anterior veneers and all-ceramic cases
• Learn a step-by-step process of veneer and anterior all-ceramic cementation
• Be able to provide patients with step-by-step post-op temporary instructions to ensure proper gingival health on seat visit
• Understand the importance of occlusion in your all-ceramic cases
• Which materials would be best suited for each case

Dr. John Nosti practices full time with an emphasis on functional cosmetics, full-mouth rehabilitations, and TMJ dysfunction. His down-to-earth approach and ability to demystify occlusion and all ceramic dentistry has earned him distinction among his peers. He has lectured nationally on occlusion, rehabilitations, and advanced diagnostic technology (JVA/JT and T-scan). As a clinical director and speaker for “The Clinical Mastery Series,” he has co-authored and teaches the “Ultimate Occlusion” Series. Prior to his involvement with “The Clinical Mastery Series,” he was a clinical mentor and speaker with the Hornbrook Group for five years. Dr. Nosti has been a featured speaker for the American Academy of Cosmetic Dentistry, Academy of General Dentistry, American Dental Association, and Yankee Dental Congress. Dr. Nosti holds fellowships in the Academy of General Dentistry, Academy of Comprehensive Esthetics, and International Congress of Oral Implantologists.
Risk Management Seminar
(4.5 hours)

Every practice strives to provide dental care for patients in an effective manner with the highest quality outcome. In order to achieve that, risk and risk management associated with all treatment must be addressed, concurrently using the latest principles and techniques available. When the proper protocols and policies are employed, patients can be treated safely and efficiently in a controlled, risk-lowered environment. This seminar will provide the latest claim information statistics to help mitigate risk and present cases and experiences of your colleagues who have experienced risk exposures.

The following risk management fundamentals will be addressed in this seminar:
• Management of patient communications by choosing words wisely, listening intently, earning trust and respect, and creating the happy and loyal patient
• Implementing office policy so the entire team utilizes the same risk and safety policies
• Providing all clinical treatment that meets or exceeds the accepted standard of care in your locality
• Understanding the basic principles of accepted chart and record documentation and the responsibilities of protecting patient health information
• Effective patient management regarding non-clinical issues and adverse events
• Fundamentals of legal concepts, including general informed consent, vicarious liability and negligence

This seminar is comprehensive in nature and meant to provide the most current information on risk management for you to utilize in your practice.

Additionally, dentists insured with the Professional Protector Plan® for Dentists (PPP) will receive 10% professional liability premium credit upon renewal for three successive years. Dentists who are not insured with the PPP may be eligible for credit by purchasing PPP coverage within one year of attending the seminar.

This course is appropriate for general and specialist dentists, associates, and staff members, with no prior experience necessary.

Registration information will be available separately.
Five Patient Lifestyle Habits That Influence Healing/Do Your Patients Have The Guts To Enjoy Oral Health?
(6 hours)
Uche Odiatu, DMD

This course will cover two topics in separate three-hour blocks.

Five Patient Lifestyle Habits That Influence Healing: Our patients don’t leave their stressful jobs, poor sleeping patterns (insomnia, apnea, snoring), their physical fitness (or lack of) or their eating patterns (mindless eating and evening feeding frenzies) in the car before they sit in our chair. There’s irrefutable scientific evidence that these habits have the ability to ramp up inflammation or dial it down. Well-adjusted, rested, physically active, healthy eating patients enjoy a physiology that supports a better response to our prevention/restorative interventions. In this high-energy, entertaining program, be prepared to have your hair blown back.

Course Objectives: Attendees will
• Discover how eating habits have the ability to dial down or ramp inflammation, and how it affects your treatment outcomes
• Learn why it’s important to identify the sleep-deprived (not just apnea) patient in your practice
• Understand why your sedentary patients don’t heal as well as your active-living patients (ALERT - 85% of your patients lead sedentary lives)
• Gain greater insight into the relationship between chronic inflammation and disease
• Develop a conversation style to positively impact your patient at the new patient and re-care exam

Do Your Patients Have The Guts To Enjoy Oral Health?: Do your patients have the guts to douse the flames of inflammation? Our patients’ gut flora make very powerful anti-inflammatory agents when fed key nutrients. Learn what impacts gut integrity: antibiotics, jet lag, fast food, artificial sweeteners, and what we dental pros can do! The latest science from the National Institutes of Health shows the microbiome impacts overall health as much as our genes. Dental industry people are the key professionals to ensure optimum functioning of the masticatory system. Attend this insightful session and enjoy a novel path to lower patients’ inflammatory burden.

Course Objectives: Attendees will
• Gain insight into the science of the human microbiome
• Learn why new findings about your patients’ gut flora are shaking the foundation of health care and nutrition
• Understand why the dental professional is perfectly positioned to help all people live more vibrant lives
• Discover the foundational role of your patient’s gut integrity and their overall immunity, metabolism, cognitive function and stress resilience

Dr. Uche Odiatu is the author of “The Miracle of Health,” a professional member of the American College of Sports Medicine and a practicing dentist in Toronto. He is an National Strength and Conditioning Association certified personal trainer, and has given over 400 lectures in England, Canada, the United States, the Bahamas, Denmark, Bermuda, and Norway.

Registration information will be available separately.
25 Shades of Grey and a Whole Lot Less Risqué/ Great Cases with New Faces
(6 hours)
John Svirsky, DDS, M.Ed.

This course will cover two topics in separate three-hour blocks.

25 Shades of Grey and a Whole Lot Less Risqué: This radiology review course has a number of common cases, in addition to some interesting unusual cases thrown in to keep the audience on their “toes.” The emphasis will be a review of common radiolucent and radiopaque lesions. Get ready to learn, laugh, and make a difference in the diagnosis and treatment of oral diseases.

25 Shades of Grey and a Whole Lot Less Risqué
Course Objectives: Attendees will be able to
• Demonstrate a logical approach to diagnosis and treatment of common radiolucent lesions found on radiographs
• Demonstrate a logical approach to diagnosis and treatment of common radiopaque lesions found on radiographs
• Recognize the common radiographic lesion found in dental practices

Great Cases with New Faces: This new, interactive course will present a potpourri of interesting cases seen by Dr. Svirsky, or emailed to him over the past few years. In this course, participants learn how to describe a lesion, develop a differential diagnosis, and treat the condition. Dr. Svirsky will show how he approaches cases and arrives at a diagnosis. The audience will help Dr. Svirsky to diagnose them, as he plays the patient. Some unusual “things” might pop up!

Great Cases with New Faces
Course Objectives: Attendees will
• Develop a logical approach to the diagnosis of oral lesions
• Learn to describe and develop a differential diagnosis of various clinical cases
• Learn to treat selected oral diseases and distinguish “good from bad”

Dr. John Svirsky is a board-certified oral and maxillofacial pathologist at Virginia Commonwealth University in Richmond, VA. Dr. Svirsky has developed a broad background in research, published numerous articles in dental literature, and earned a master’s degree in adult education. He is a sought-after speaker, with an international reputation as an informative and entertaining lecturer. He is an honorary member of the Thomas P. Hinman Dental Society, and has received a presidential citation from the American Dental Association for significant contributions to the health of the public and the profession of dentistry. In 2012, he received the William J. Gies Award from the Greater New York Dental Meeting for contributions to oral health. The Alumni Association of Virginia Commonwealth University chose Dr. Svirsky to receive the 2013 Outstanding Alumnus Award. In 2015, he received the Distinguished Service Award from the Dawson Academy for advancement of the dental profession through research, publication, and education, and has been awarded an honorary membership in the American Academy of Oral Medicine.

Registration information will be available separately.
The MDA's 2020-2021 Continuing Education Series Has A Variety of Courses For the Entire Dental Team

Course Topics Will Include:

- Tobacco and Nicotine Products
- Dental Implants/Hard and Soft Tissue Regeneration
- Allergies and Dentistry/Drug Interactions
- Technology In Your Dental Practice
- Cosmetic Dentistry
- Patients' Lifestyle/Health
- Oral Radiology/Lesions

NOTE: Some courses will be held virtually. Venues are subject to change.

Package plans and individual registration available. To register, or for more information, go to www.medentalce.org
